One frame window with multiple configurations

Awning , Casement, Fixed & Hoppers

Gerkin Aluminum thermally broken commercial windows with 2 3/8" frame depth.
 Can be glazed 1" units. Standard colors available: clear anodized, dark bronze anodized, white painted or bronze painted. Custom colors are available upon request.

There are many different configurations that can be used in the Gerkin stand alone system. When choosing your configuration you must use the following guidelines.

1. The rails can not be crossed in a 1 frame configuration

2. Maximum rough opening can not exceed 144" width X 72" height or 72" width X 144" height

3. Reference dimensions must conform to the following:

	max size	min size roto	min size push / pull
5100 Awning	60" x 30"	21" x 17 1/2"	12 1/2" x 17 1/2"
5200 Hopper	60" x 30"	N/A	12 1/2" X 12 1/2"
5300 Casement	36" x 72"	15" x 21 3/4"	12 1/2" x 21 3/4"
5500 Fixed	48" x 72"	N/A	12 1/2" x 12 1/2"

Side-stack configurations with no structural mull

Awning , Casement, Fixed & Hoppers

Gerkin Aluminum thermally broken commercial windows with 2 3/8" frame depth. Can be glazed with 1" units. Standard colors available: clear anodized, dark bronze anodized, white painted or bronze painted. Custom colors are available upon request.

Caulk interior & exterior leg of stack rail

Rhino seri Stacking detail
(A)

There are many different configurations that can be used in the Gerkin side stack system. When choosing your configuration you must use the following guidelines.

1. The rails can not be crossed in a 1 frame configuration

2. Individual frame cannot exceed 48" wide X 72" tall

3. Reference dimension must conform to the following:

	max size	min size roto	min size push / pull
5100 Awning	48" x 30"	21" x 17 1/2"	12 1/2" x 17 1/2"
5200 Hopper	48" x 30"	N/A	12 1/2" x 12 1/2"
5300 Casement	36" x 72"	15" x 21 3/4"	12 1/2" x 21 3/4"
5500 Fixed	48" x 72"	N/A	12 1/2" x 12 1/2"

Side-stack configurations with structural mull

Awning , Casement, Fixed & Hoppers

Gerkin Aluminum thermally broken commercial windows with 2 3/8" frame depth. Can be glazed with 1" units. Standard colors available: clear anodized, dark bronze anodized, white painted or bronze painted. Custom colors are available upon request. **3 piece mull**

RHINO SERIES PANNING SYSTEM

caulk full perimeter

The Gerkin panning system is ideal for retrofit projects where you can't remove existing frames or there is some irregularities in the opening. The panning system is designed to cover unsightly conditions. On some projects panning can save labor when replacing old inefficient unsightly windows with thermally broken energy efficient windows that have a new and clean look. When using the panning system check out our interior snap trims that can be adapted to many conditions and will give you a nice finished look both interior and exterior.

caulk full perimeter

Vinyl bulb is for tolerance only, it is not a weather stripping.

RHINO SERIES SUBFRAME SYSTEM

The Gerkin subframe system is ideal for new construction or retrofit projects where you don't want to set up bulky scaffolding or rent expensive lifts for window installations. The subframe is a two piece receptor system that is thermally broken and allows you to install windows from the interior of the building. When used the subframe system can save both time and money

- Page 58F-5 Sizing guidelines for stacking vertical

GERKIN WINDOWS 5800 FIXED STAND ALONE WINDOWS

5800 series windows has optional factory applied flanges that can be ordered as 1" set back or flush exterior face

5800 windows can be ordered with factory installed operating vents (Awnings, Casements or Hopper units)

Gerkin also has other accessories available to help make installation easier. Some of the accessories are Panning, Sub-frame, Extruded sill flashing and Interior snap-trim

Guidelines

1-Lite windows can not exceed 60" x 99", 72" X 72" OR 48" x 120"

Multi lite windows can not exceed 60" x 99",48" x 120" OR 72" X 72"

Reference dimensions minimum 18"

When windows are multiple lites tall, Horizontal dividers can not exceed 72" Wide X 60" tall

GERKIN WINDOWS 5800 FIXED ONE FRAME WINDOW WITH MULTIPLE CONFIGURATIONS

5800 series windows has optional factory applied flanges that can be ordered as 1" set back or flush exterior face

5800 windows can be ordered with factory installed operating vents (Awnings, Casements or Hopper units)

Gerkin also has other accessories available to help make installation easier. Some of the accessories are Panning, Sub-frame, Extruded sill flashing and Interior snap-trim

Guidelines

Reference dimension sizing can not exceed 60" x 99"

Reference dimensions minimum 18"

When windows are multiple lites tall, Horizontal dividers can not exceed 72" Wide X 60" tall

Maxinum overall window size 120" x 90"

GERKIN WINDOWS SIDE STACK 5800 FIXED WITH STACKING TRUE-MUNTIN RAIL

Due to expansion and contraction 40' max run
Can continue to stack as long as each window
does not exceed 60" x 99"

While the above window configuration could be built as 1 complete unit, The size and weight could make this unit hard to handle and install. Gerkin Windows 5800 with a stacking true mutton rail allows the end user to receive individual windows that are much easier to handle.

Once the 5800 units with the stacking true mutton are sealed and stacked together all the dividers within the opening match leaving a 2 1/2" sight line

5800 series windows has optional factory applied flanges that can be ordered as 1" set back or flush exterior face

5800 windows can be ordered with factory installed operating vents (Awnings, Casements or Hopper units)

Gerkin also has other accessories available to help make installation easier. Some of the accessories are Panning, Sub-frame, Extruded sill flashing and Interior snap-trim

Guidelines

Each individual window can not exceed 60" x 99"

Reference dimensions minimum 18"

Factory mullered units can not exceed 120" x 90"

For more information contact Gerkin Windows & Doors (402) 494-6000 gerkin@gerkin.com

GERKIN WINDOWS SIDE STACK 5800 FIXED WITH STACKING MAIN-FRAME

Due to expansion and contraction 40' max run
 Can continue to stack as long as each window
 does not exceed 60" x 99", 48" x 120" or 72" x 72"

While the above window configuration could be built as 1 complete unit, The size and weight could make this unit hard to handle and install. Gerkin Windows 5800 with a stacking main-frame allows the end user to receive individual windows that are much easier to handle.

5800 series windows has optional factory applied flanges that can be ordered as 1" set back or flush exterior face

5800 windows can be ordered with factory installed operating vents (Awnings, Casements or Hopper units)

Gerkin also has other accessories available to help make installation easier. Some of the accessories are Panning, Sub-frame, Extruded sill flashing and Interior snap-trim

Guidelines

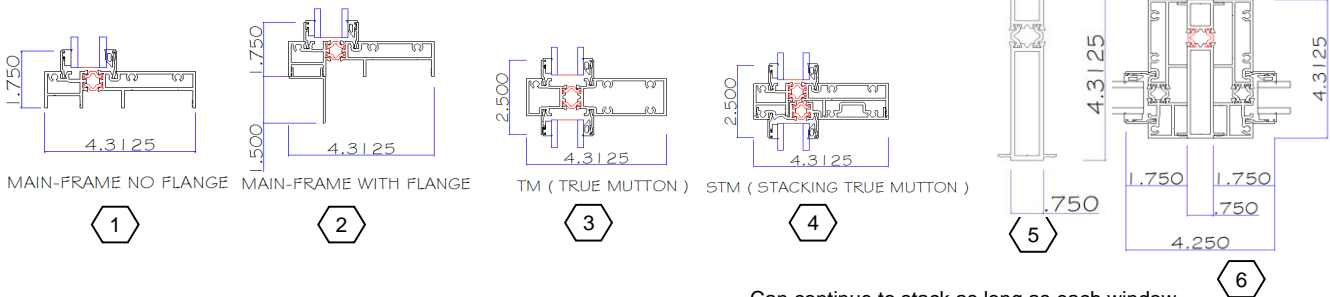

Each individual window can not exceed 60" x 99", 48" x 120" or 72" x 72"

Reference dimensions minimum 18"

Factory mullered units can not exceed 120" x 90"

GERKIN WINDOWS GUIDELINE WHEN USING A58119 STRUCTURAL STACK RAIL

Can continue to stack as long as each window dimension does not exceed 48" x 144"

5800 series windows has optional factory applied flanges that can be ordered as 1" set back or flush exterior face

5800 windows can be ordered with factory installed operating vents (Awnings, Casements or Hopper units)

Gerkin also has other accessories available to help make installation easier. Some of the accessories are Panning, Sub-frame, Extruded sill flashing and Interior snap-trim

Guidelines

When windows are over 99" tall Width cannot exceed 48"

Note: multi-lite windows over 120" tall exceed AAMA certification

When stacking with the structural stack, individual lites cannot exceed 120" and overall height cannot exceed 144"

Reference dimensions minimum 18"

GERKIN WINDOWS HEAD STACK 5800 FIXED WITH STACKING MAIN-FRAME

5800 series windows has optional factory applied flanges that can be ordered as 1" set back or flush exterior face

5800 windows can be ordered with factory installed operating vents (Awnings, Casements or Hopper units)

Gerkin also has other accessories available to help make installation easier. Some of the accessories are Panning, Sub-frame, Extruded sill flashing and Interior snap-trim

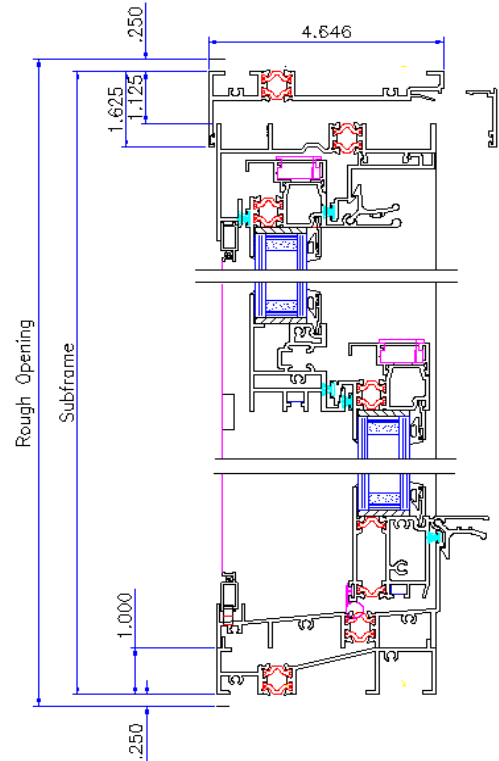

Guidelines

When head stacking overall height maximum is 16'

(Up to 48" wide) bottom windows max height is 120", windows stacking above can not exceed 72" tall

(Over 48" up to 60" wide) bottom windows max height is 99", windows stacking above can not exceed 72" tall

(Over 60" up to 72" wide) bottom windows max height is 60", windows stacking above can not exceed 60" tall

Gerkin Aluminum thermally broken Sub-frame system for 4 5/16" frames.

Other accessories that are compatible with 4 5/16" frames:
 1- Gerkin Panning system See Page RC-9
 2- Gerkin 1" X 3" Interior snap-trim See page RC-11
 2- Gerkin Sill flashing See page RC-11
